

Associate in Applied Science in Engineering Technology

Program Outcomes

Upon completion of this degree, students will be able to apply established scientific and engineering knowledge to the solutions of industrial problems.

Employment Opportunities or Additional Educational Options

With this degree, graduates typically seek work for major technological companies in areas which deal with application, manufacturing, implementation, engineering operating, sales and production. They are often the "implementers" of designs and plans. Engineering technicians usually work as part of a team with the craftsman and the engineer, working closest to the engineer in duties and responsibilities. Graduates with an associate degree often continue on to complete a bachelor's degree and become engineering technologists. This degree is designed to transfer into three different bachelor's degrees at Western Michigan University: Engineering Design Technology (EDT), Manufacturing Engineering Technology (MFT), or Engineering Management Technology (UEM).

***Note: If you are interested in Engineering (Mechanical, Electrical, Chemical, Civil, Environmental, etc.) please follow the Associate in Science in Science, Engineering and Math Professional degree program.**
